WELCOME

“ Unlock the potential of
creativity and wellbeing....”

Chairman Tarhan Telli

WHO ARE WE?

TTMedical Group was born out of the passion from its chairman Tarhan Telli to create technology and encourage innovation to improve social and personal well-being.

TTMedical Group has been a partner with the Turkish Ministry of Health since the outbreak of the Covid pandemic. We are extremely honoured to be selected by the Turkish government to provide surgical masks and PPE of the highest standards and continue to expand our product portfolio with research and investment into the manufacturing of our machinery operations to elevate our products performance and quality.

TT MEDICAL FACTORY PLAZA

TT Medical Group is the leading manufacturer of healthcare and medical products in Turkey. We create solutions purposefully designed and manufactured to provide products of the highest quality conforming with international regulatory requirements.

TT MEDICAL MANAGEMENT PLAZA

Our mission is to build a sustainable global manufacturing supply chain earning trust for our brand and products to support the delivery of healthcare to those who need it most.

WE STRIVE TO INNOVATE

During unprecedented pandemic challenges, convergence of technology and healthcare has driven innovation to produce sustainable manufacturing. TT Medical has an established R&D team and partner network to transform ideas into commercially viable products. Adhering to international manufacturing health and safety standards. All our products are certified with FDA and universal certifications to allow global distribution. Product testing conducted by international reputable agencies.

SUSTAINABILITY

Our modern Istanbul facility conforms with all environmental ISO 14001 management systems in addition to local health and safety / fire regulation requirements.

We ensure the highest standards of working environment is adhered to within SEDEX ETHICAL manufacturing audits and certification. We take care to improve the working conditions of all our staff and strictly condemn all child and forced labour, we only work with reputable and established partners in our supply chain.

With dust extraction installations and air conditioning units we invest into the welfare and high working conditions of our staff while maintaining the same commitment to the environment of a modern production facility.

Our drinking water is filtered avoiding health hazards with containers eliminating plastic waste bottle consumption used in our premises. We pursue all opportunities to reduce the impact of our carbon footprint and welcome all support from our staff, customers and suppliers to reduce harm to the environment.

Our materials supply chain is established with reputable and audited partners OEKOTEX certified.

We take pride with our longterm TEMA relationship to protect natural endangered habitats in Turkey.

1

TT 50 - TT100 Fully Automated 3 Ply Mask Machine

TT Medical Group has established production of the most advanced domestically manufactured mask machinery and continues to dominate as leader in the Turkish market.

Our expert engineering teams have designed and built reliable and efficient production of 3 ply disposable surgical mask machinery with fully automated elastic loop attachment using the the highest quality components with current daily production capacity **TT50** 80.000 units and **TT100** 140.000 respectively.

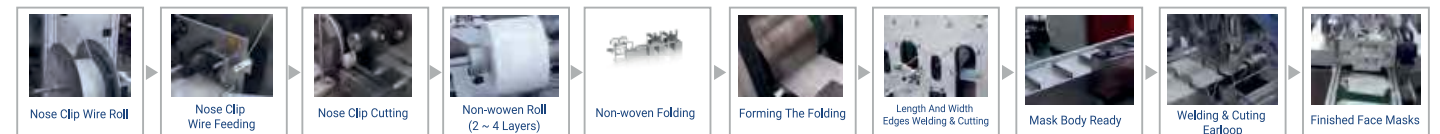

We have a reliable and sustainable manufacturing facility without the dependency of external technical and servicing support for parts and continue to upgrade our models for improved consistency in production performance. In addition to very little wastage of raw materials cost the surgical mask making machine performs most of its functions automatically without the help of an operator providing further savings but more importantly the risk of contamination is reduced.

The importance of efficient production is paramount to protect aid workers health while improving comfort and satisfaction with performance.

Our KN95 machinery has been added to our portfolio and expansion plans for rapid increase in production to support global aid workers are in progress.

THE MAIN FEATURES OF THE MACHINE INCLUDE:

- * Ultrasonic welding capabilities with very high levels of stability.
- * Multi-functional integrated machining systems with precision welding of earloop elastic and high output of finished products with automated collection and stacking.
- * Photo-electric sensor detection which is highly reliable with low rates of failure.
- * Compact in size and covers a very limited amount of floor space for high productivity capacity.

MODEL	TT 50	TT 100
Masks Type	Size: 175 mm x 95 mm Flat earloop disposable medical face masks	
Productivity Varies According To Production Management	40 ~ 60 Pcs / Min	80 ~ 110 Pcs / Min
Leadtime Confirm With Sales In Advance	23 ~ 28 Days	25 ~ 30 Days
Power	220V AC ± 5% , 50 Hz,~7 Kw	220V AC ± 5% , 50 Hz,~8.8 Kw
Dimensions (Lxwxh Mm)	4500 x 2500 x 1700	6800 x 4800 x 1860
Area Occupied	~ 15.8 m²	~ 32.6 m²
Compressed Air Source Requirements	0.5~0.8 Mpa With Basic Filtration Airflow Rate 300 L/min	0.5~0.8 Mpa With Basic Filtration Airflow Rate 305 L/min
Facility Environment Requirements	Temp. 10~40 °c / Humidity 5~35 % / No Flammability Possibilities / No Corrosive Gas, No Dust / Air Cleanliness Is Not Less Than 100,000	
Ppm	≥ 60(60 ~ 80), Varies according to materials and specifications	
Qualified Rate	≥ 99% (Under correct raw materials and running)	

TYPE IIR MATERIALS

We have selected and developed materials to provide the highest performance levels tested by international reputable laboratories.

Our commitment to surpassing entry standards for international testing targets has driven our ambition to elevate TTMedical products to lead the market with unrivalled performance.

*Certification and test reports are available on request.

3 Ply IIR Surgical Mask Production Line

TT MEDICAL GROUP SETS THE STANDARD FOR MASK PRODUCTION.

Our high speed automated production line has been upgraded to allow the sterilisation of masks during the manufacturing process. A breakthrough for 3 ply mask production leading the market and setting new standards of healthcare production and equipment.

A custom commissioned production clean room at ISO level 7 air filtration adhering to international hospital health and safety regulations. Installed by our foreign partners and collaborated with the advanced sterile production line further reassures all our international customers. TTM does not compromise on any stage of our business activity and investments while remaining commercially competitive. The unit can be upscaled for higher capacity with the confidence TTM provides the technical and servicing guarantees from our inhouse teams.

Our module has been designed to allow high productivity with minimum machine operators within the protection of a clean room environment.

Reducing both air born and physical transfer of pollutants and bacteria risking contamination of masks during the production process. The sterile treatment further eliminates bacteria prior to final packing process.

Packaging box options for vacuum or shrink wrapping system can be collaborated to process various sizes efficiently without disruptive complicated setup installation.

The vacuum packing process employs a air tight seal protecting the package completely from external interference.

With our easily recognised security hologram tag protects against counterfeiting and from contamination and confidence with expiry dates. Further details on the custom facility model are available via private requests.

3

Type IIR Surgical Face Mask

Our Type IIR 3-ply disposable surgical face mask, soft and comfortable fitting with ear loops and easy breathability has been designed to perform above test entry requirement levels for international certification standards. Every detail from the production and testing of non woven fabrics, elastic quality to minimise skin irritation has been carefully selected.

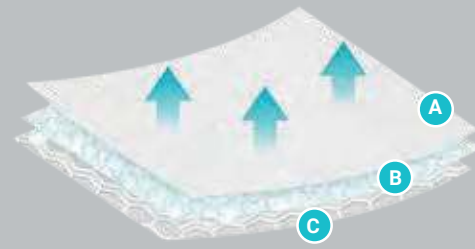

Available in both sterile and non sterile packaged options.

ABOUT THIS PRODUCT

- * 3-ply disposable surgical face mask
- * BFE of 99%
- * Fluid resistance in excess of 16kPa / 120 mm Hg
- * Breathability differential pressure below 60a / cm²
- * FDA certified

PACKAGING

- * 5 -10 VACUUM PACK
 - * 25 - 50 BOX PACK
- Available in White, Blue, Black, Beige, and Grey
Carton and bulk packaging details available on request.

A - Outer Layer

Hydrophobic non-woven layer.
Antibacterial & repellent non-woven fabric.

B - Middle Layer

High barrier meltblown filter.

C - Inner Layer

Soft skin-friendly non-woven fabric.

SPECIAL BRANDED FACE MASK

On your demand, we are ready to customize our advanced high technology A to Z production line and use the best 3 ply fabrics to create your special branded face mask that has all the benefits of TT Medical certifications.

4

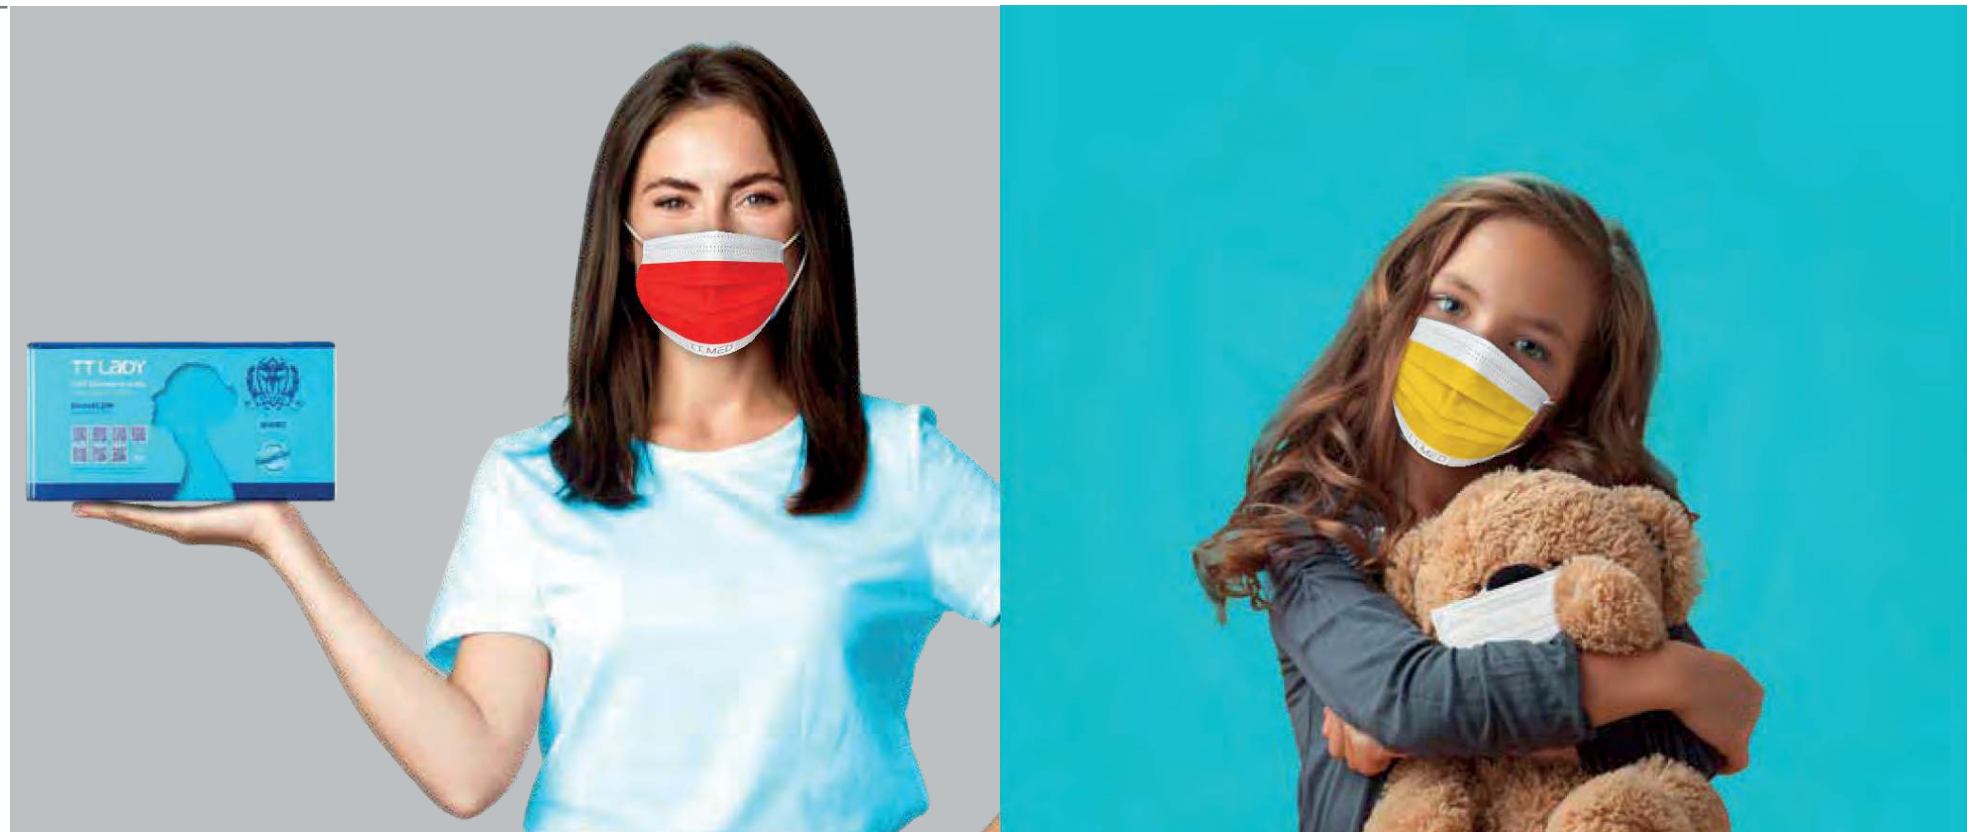

Type IIR Surgical Face Mask

LADY FACE MASK

Using the same high-quality fabrics, and taking in our consideration the elegance and perfect sizing, we designed and created the first LADY face mask.

99% BFE Type IIR 3-ply disposable surgical face mask, soft and comfortable fitting with ear loops and easy breathability.

Special sizes: 14,5 x 8,5 mm.

TT LADY MASK

TT MED MASK

- * Available in Blue, Black, Beige, and Grey
- * Fluid resistance in excess of 16kPa / 120 mm Hg
- * Breathability differential pressure below 60a / cm²
- * FDA certified

ABOUT THIS PRODUCT

- * 3-ply disposable surgical face mask
- * Available in White, Blue, Yellow, and Maroon BFE of 99%
- * Fluid resistance in excess of 16kPa / 120 mm Hg
- * Breathability differential pressure below 60a / cm²
- * FDA certified

PACKAGING

50 BOX PACK
Carton and bulk packaging details available on request.

KIDS MASK

Our guaranteed 99% BFE tested and approved 3 ply Kids Face Mask is your kid's first protector.

Soft and suitable for +3 year old kids, created with high-quality material for the best protection and high breath-ability.

Neoprene Fabric Face Mask

Reusable and washable synthetic face mask created from soft durable scuba/neoprene fabric designed to stop the spread of infection. Fabricated cloth coverings can reduce viral transmission by 70% with the correct facial fitting.

Not be used as a substitute for medical grade but providing a comfortable form fitting with a blend of stretch fibres maximises air flow without trapping moisture especially for everyday and active use ensuring you wont overheat .

Available in a single size with adjustable elastic for a tailored fit.

ABOUT THIS PRODUCT

- *Washable and reusable.
- *Hypoallergenic material.
- *Effective against air pollution.
- *Hand wash in warm water air dry out of direct sunlight.
- *Available in colours black, blue, turquoise.

PACKAGING

- *Single sealed unit.
- *Carton and bulk packaging details available on request.

6

Protective FFP3 Face Mask

Respiratory masks are the best way to prevent disease from spreading and ideal for precaution and protection against viruses. This lightweight single use disposable FFP3 medical grade cup mask with respirator is designed to provide highest level of protection against exposure to airborne viruses and bacteria particles.

Featuring an exhalation valve to reduce moisture and heat build up with cushion fitting for added comfort reducing the pressure discomfort on the users face ideal for wearing over a longer period of time. The four point headband attachment and adjustable nose clip ensures correct fitting to form a secure tight seal and prevent leakage while reducing slippage during wear.

ABOUT THIS PRODUCT

- * FFP3 protective mask with valve
- * Available in 3 cols blue, turquoise and white
- * BFE in excess of 95%
- * Conforms to EN 149:2001+A1 2009
- * Meets requirements of EU 2016/425
- * FDA certified

PACKAGING

- * Single sealed unit. Carton and bulk packaging details available on request.

7

Protective FFP3 Face Mask

Respiratory masks are the best way to prevent disease from spreading and ideal for precaution and protection against viruses. This lightweight single use disposable FFP3 medical grade mask with respirator is designed to provide highest level of protection against exposure to airborne viruses and bacteria particles.

Our form shaped mask provides the same high protection performance as our cup.

Featuring an exhalation valve to reduce moisture and heat build up with cushion fitting for added comfort reducing the pressure discomfort on the users face ideal for wearing over a longer period of time. Adjustable nose clip ensures correct fitting to form a secure tight seal and prevent leakage while reducing slippage during wear.

ABOUT THIS PRODUCT

- * FFP3 protective mask with valve
- * Available in 3 cols blue, turquoise and white
- * BFE in excess of 95%
- * FDA certified
- * Conforms to EN 149:2001+A1 2009
- * Meets requirements of EU 2016/425

PACKAGING

- * Single sealed unit
- Carton and bulk packaging details available on request

8

Nano Mask

OUR TEAMS HAVE DEVELOPED
A VIRUS KILLING SPRAY FOR
APPLICATION TO OUR NANO
MASK ALLOWING MULTIPLE USE
FOR MAXIMUM PROTECTION.

RE-USABLE NANO MASK

The nano mask provides safety while allowing high performance and comfort with airflow.

The thickness of nano technology fibre is a thousandth strand of hair, much finer than regular meltblown filters. Allowing higher filtration of bacteria with improved airflow for easy breathing.

The nano membrane filter is moisture resistant, durable and even re-usable up to 10 times with spraying/sterilizing TTM ethanol solution to maintain its optimum filtration efficiency.

ABOUT THIS PRODUCT

- * N95 FFP2 protective mask
- * Available in 2 cols black and white
- * BFE 99,9%
- * FDA certified
- * Conforms to EN 149:2001+A1 2009
- * Meets requirements of EU 2016/425

PACKAGING

- * Single sealed unit
- Carton and bulk packaging details available on request.

Re-usable up to 10 times with
TT MEDICAL ethanol sterilizing
spray to maintain original
filtration efficiency.

King FFP2 King Mask

TTP2 KING masks have the advantage of the highest filtration properties owing to the double layers of meltblown and spunbond.

Designed using the state-of-art 3D technology TT KING TTP2 masks ensure your maximum comfort combined with the first-class protection. Wide nose bridge, soft and flexible ear loops as well as smart filtration and high permeability will give you peace of mind while being easy to wear throughout the day.

The highest quality meltblown filter provides the BFE filtration of 95%.

Each mask is sterilized and packed separately making the usage easier and more hygienic.

KEY FEATURES

- *Increased air permeability
- * Waterproof
- *Antibacterial
- * Ultralight
- * 3 Dimensional design

ABOUT THIS PRODUCT

- * Protective mask
- * Available in 2 cols black and white
- * BFE in excess of 95%
- * FDA 510k certified
- * Conforms to EN 149:2001+A1 2009
- * Meets requirements of EU 2016/425

PACKAGING

- * Single sealed unit
- Carton and bulk packaging details available on request.

10

Comfort Mask

WASHABLE MASK WITH REPLACEABLE NANO FILTER

Face coverings still remain the most effective defence to reduce the spread of virus.

A washable reusable mask engineered with an internal pouch pocket for disposable nano filter patches protects from micro particles and bacteria.

The outer fabrication made from soft fibre materials provides higher level of comfort with adjustable loops allowing custom fitting for daily use.

The interchangeable nano filters provide 95% bacterial filtration efficiency for each use. We recommend washing the outershell every 2/3 uses upto 40 times for peak performance.

As the use of masks becomes more common and gains popularity in widespread use by the general public. Material masks can offer limited protection without correct filters to block bacteria, our comfort mask provides a solution for both with replaceable filters.

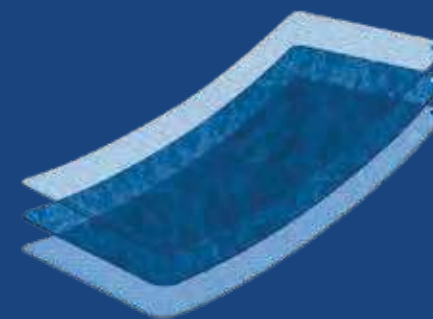

ABOUT THIS PRODUCT

- * Protective mask
- * Available in 2 colours blue and turquoise
- * BFE in excess of 95%
- * Conforms to EN 149:2001+A1 2009

Nanofiber filters even the smallest particles like bacteria out your oxygen flow to protect and keep you healthy.

PACKAGING

- * Single sealed unit
- * Nano filters sold in packs of 10

Carton and bulk packaging details available on request.

TT MASK

Summer Mask

TT summer masks made out of ultra thin and carefully selected layers allow better airflow in both hot and humid weather conditions. Owing to their extra soft ear loops and breathability they provide best protection combined with comfort. The quality of protection is not comprised by the external factors like the sea salt, sun or sunscreen.

TT Summer Masks comprise of very unique texture of non woven layers preventing your skin from perspiration and alleviating breathing in high temperatures. At the same time, the meltblown layer in TT summer masks contributes to 99% of protection against the smallest virions even in the most crowded places.

TT Summer masks are a must for outdoor enthusiasts during summer months by facilitating comfortable breathing and assuring maximum defence against viruses and bacteria.

TT summer masks have been designed in accordance with international guidelines and certificates, to meet the highest protection standards.

Protective Gown

ULTRA FABRIC PROTECTIVE GOWN

Single use disposable gowns, available in standard and sterile treated intended for use in infection control practices to reduce the potential exposure to microbial penetration and liquids.

Anti static soft and pliable finish for comfort in both standard and raglan sleeve settings. Full coverage procedure gown with drop sleeves utilizing hook and loop neck closure and tie waist. Knitted wristband for a secure fit and with excellent air, heat and water vapour circulation.

We ensure the highest standards of working environment is adhered to within **ISO & SEDEX** ethical manufacturing audits and certification.

Ensuring not only do our gowns meet testing standards but we also take responsibility for management and control against forced and child labour.

Our gowns are available in 2 sleeve setting options. Standard and raglan to offer comfort with maximum movement for different body types. Without compromising the performance standards for health and safety we continue to create uniforms that also allow freedom of movement fit for purpose improving form and function.

ABOUT THIS PRODUCT

- * Single use sterile disposable isolation gown
- * Conforms to EN 13795 1:2019

BEST PROTECTION IN TOUGH TIMES

22 Medical Eyewear

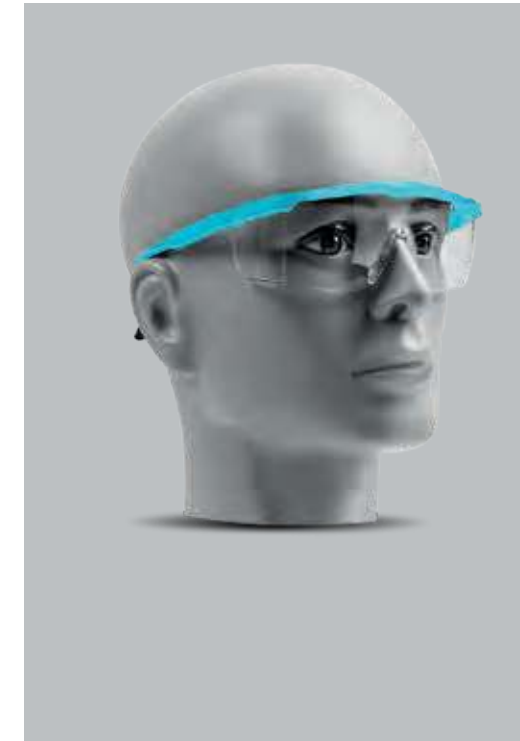

Eye protection remains an important risk factor to prevent a variety of potential airborne infectious diseases.

Our general purpose medical goggles provide an improved barrier against these viruses from entering the eye and can be used in conjunction with other personal protective equipment such as gloves, gowns and masks to provide complete protection.

The frame has been designed to provide maximum comfort for long periods of time and the clear lens ensures peripheral vision isn't distorted with anti fog treatment to prevent mist forming on the lens.

The large lens can block fluid and protect from dust to ensure safety in multi use options with low and high risk exposure.

Reusable with the correct cleaning and disinfection process our goggles are made from quality materials to allow long term use without compromising on performance.

ABOUT THIS PRODUCT

- * Medical goggles
- * Available in 2 colors blue and ecru
- * Anti-fog
- * Conforms to EN 166:2001

PACKAGING

- * Single pack
- Carton and bulk packaging details available on request.

23 The Antibacterial Pod

The need for instant hand sanitising in healthcare motivated the TTMedical team to engage and develop an antibacterial pod that is always available for use with effective hand coverage of our alcohol based Aloe vera extract formula.

Attached to the waist or pocket and with a simple wiping action of the hand over the pod, rub hands together to distribute the antibacterial gel and repeat for even coverage.

The pod is effective for use in all environments where practical and instant access is required for healthcare workers, gyms, public transport and general industry.

Clip Fastening

Even Distribution

Compact Design

STEP 1

Fasten the The Antibacterial Pod to your waistband or another secure point of attachment.

STEP 2

Swipe your hand down the The Antibacterial Pod, from the tips of your fingers to the ball of your palm, applying firm pressure. Repeat as necessary to dispense sufficient gel for Step 3.

STEP 3

Rub your hands together, taking care to spread the gel across all parts of both hands.

ABOUT THIS PRODUCT

- * Sanitiser gel pod
- * Conforms to EN 1276 | EN 1650 | EN 14476
- * Flammable: Keep away from fire or flame. Store below 25°C.

PACKAGING

- * Available in a single pack
- * Carton and bulk packaging details available on request

SPECIAL FOR
CORPORATE
TT MASK

TT CORPORATE MASK

TT corporate masks combine your company trademark with the highest protection against bacteria and viruses.

Our custom-made masks, produced using state-of-art technology, are an excellent solution for our corporate customers who aim at making their companies distinctive during the pandemic.

The corporate masks carry all the quality standards of the IIR 3-ply disposable surgical masks and having the logo printed or special color used does not hinder the product quality.

The outer layer, is made from hydrophobic non-woven layer allowing the humidity that occurs while breathing escape.

The middle layer, meltblown filter, provides the best available protection while inner layer gently prevents and skin irritation.

Ultra soft earloops and adjustable nose bridge allow perfect fit for the highest protection.
